Supplementary material online

doi:10.20452/pamw.4129

Please note that the journal is not responsible for the scientific accuracy or functionality of any supplementary material submitted by the authors. Any queries (except missing content) should be directed to the corresponding author of the article).

Abbreviations

ACE-I – angiotensin converting enzyme inhibitor
AGEs - advanced glycation end products
API - Approximal Plaque Index
BMI - body mass index
GI - Gingival Index
HbA1c - glycated hemoglobin
HDL - high-density lipoproteins
hsCRP - high-sensitivity C-Reactive Protein
IQR - interquartile range
LDL - low-density lipoproteins
SBI - Sulcus Bleeding Index
skin AF - skin autofluorescence
T1D – type 1 diabetes
TG – triglycerides
TSH - thyroid-stimulating hormone
T-Chol - total cholesterol
Declarations

Ethics approval and consent to participate
Authors obtained informed consent from the patient and local Bioethical Committee of Poznan University of Medical Sciences to publish the article.

Consent for publication
Authors obtained informed consent from the patient.

Competing interests
The authors declare that they have no competing interests.

Funding
This study was supported by Poznan University of Medical Sciences (Grant No 502-01-02209324-07058, granted to MWS). The funder had no role in study design, data collection and analysis, decision to publish, or preparation of the manuscript.

Authors' contributions
ADS conceived the idea for the study. ADS, MWS, AS and DZZ contributed to the design of the research. ADS, JL, MT and MWS were involved in data collection. ADS, MWS and DZZ analyzed the data. DZZ and AS reviewed the final version of the manuscript. MWS coordinated funding for the project. All authors edited and approved the final version of the manuscript.
